SUMMARY

Detail-oriented emerging user experience designer with 4 years of professional experience in content design and front-end web development. Experienced in Angular, React, HTML, CSS, JavaScript, and Figma. Strong communicator who effectively collaborates with engineering, marketing, design, and product teams. Approaches design with software engineering and accessibility perspectives in mind, ensuring designs are practical and feasible across all types of users. Skilled at translating technical and business requests into thorough and intuitive solutions.

SKILLS AND CERTIFICATIONS

- **User experience:** Figma, FigJam, Balsamiq, user research, interaction design, prototyping, information architecture, usability testing, wireframing, tree testing, card sorting
- **Programming:** Python, Java, JavaScript, HTML, CSS, Markdown, Angular, React, Git
- **Content management systems:** Contentful, InVision Power Services, Claravine
- **Agile methodologies:** Scrum, Kanban, Kanplan
- **Project management:** Jira, Confluence
- **Microsoft Office:** SharePoint, Word, Excel, PowerPoint
- **Certifications:** TCPS 2 Core Certificate, Apollo GraphQL Associate

SELECTED PROJECTS

Focuspace

Sep – Nov 2024

Fundamentals of UX Design – University of Toronto

- Collaborated with 4 other students to design Focuspace, a mobile app to optimize the productivity and work-life balance of remote workers
- Conducted user research with 2 working professionals to gather insights that could guide the design of the app
- Created an affinity map using FigJam to cluster patterns from user research into key themes for further ideation
- Presented research insights to industry experts from IBM and addressed expert feedback in upcoming iterations
- Designed wireframes and mockups using Figma to translate research insights into viable design solutions

EarthBook

Jan – Apr 2024

User Interface Design – University of Toronto

- Leveraged Figma to design EarthBook, a mobile app for environmentalists to connect, share resources and events, and motivate one another to help make the world a better place
- Devised a high-contrast version of EarthBook to advocate for accessible design, with each colour combination having an aspect ratio of at least 7:1 to meet WCAG compliance level AAA
- Established a comprehensive design system to guide the visual direction of the app

RELEVANT EXPERIENCE

Rogers Communications

May 2023 – Jul 2025

Web Coordinator

Toronto, ON

- Coordinated daily with the marketing team to process a high volume of requests for updates regarding quarterly, product, and seasonal campaigns on the Rogers Business site (rogers.com/business)
- Consistently utilized Contentful to implement UI and copy changes efficiently and accurately as well as Claravine to generate IDs for the marketing team to track analytics from page links
- Conducted thorough quality assurance checks to ensure information displayed on the site was accurate and concise by the given launch date

- Led a teamwide knowledge transfer session on accessibility audits by doing a presentation and creating a page on Confluence for my team to learn more about web accessibility
- Served as the wireless prime for the team by responding to inquiries from the wireless team and launching new devices and device pricing updates in a timely manner

Just Sustainability Design Lab, University of Toronto

Feb – Mar 2025

Front-End Developer

Toronto, ON

- Configured and developed an informational website for Save the AI (savethe.ai), a satirical campaign regarding the environmental implications of generative AI use, using HTML, CSS, and Markdown
- Facilitated a workshop on Zoom to help other lab members get acquainted with using GitHub to update the website
- Received media coverage from the Energy Mix, a community climate news site, to increase site's visibility

Rogers Communications

May 2021 – Dec 2023

Angular Developer

Toronto, ON

- Frequently utilized AngularJS, HTML, and CSS to translate design mockups provided by the design team into functional and visually appealing user interfaces for the Rogers Business site
- Thoroughly tested and debugged code changes to identify and resolve issues, ensuring high-quality and bug-free software delivery
- Maintained page content using Contentful up to 5 times a week to deliver fast and efficient digital experiences
- Worked closely with designers, product owners, and product specialists in an agile team to implement new features and enhancements
- Wrote unit tests for Angular components and ran test cases using Jest, achieving at least 70% test coverage

HypraCycle

Apr – May 2022

User Experience Designer & Front-End Developer

Toronto, ON

- Designed and developed a website for HypraCycle, a local e-bicycle business, using the InVision Power Services suite for hosting the site and Figma for prototyping
- Implemented a kit configuration wizard on the site to ensure a seamless kit ordering process for customers

EDUCATION

University of Toronto

Sep 2022 – Jun 2026 (expected)

Master of Information, User Experience Design

Toronto, ON

Relevant courses: User Interface Design, Information Architecture, Fundamentals of UX Design

University of Toronto

Jun 2020

Honours Bachelor of Science, Computer Science

Toronto, ON

Relevant courses: Human-Computer Interaction, Software Design, The Design of Interactive Computational Media, Intro to Software Engineering

AWARDS

- **Dec. 2020:** University of Toronto Toastmasters Professor Peter E. Weiss Award for contributions to club, dedication to learning, and embodiment of the Toastmasters mantra
